PROJECTS

Web-based Cab Booking System with Admin Management (Nov-2023 to Feb-2024)

- Developed a dynamic web-based cab booking platform using Java (Servlets, JSP) for backend development, JDBC for database connectivity, and PostgreSQL as the relational database.
- Implemented admin panel features to manage drivers, cars, and booking details.
- Designed and integrated user authentication and authorization modules, including secure login and session management.

Web-Based Retail Platform for Product Browsing and Order Management (Dec-2022 to March-2023)

- Developed a web-based retail platform utilizing Java (Servlets, JSP) for backend development, JDBC for database interaction, and PostgreSQL as the database solution.
- Built robust features for user profile management and an end-to-end order processing system.
- Focused on backend performance optimization and ensured seamless interaction between the application and the database.

SKILLS

Programming Languages:- Java (Core, J2EE), SQL

Web Development: HTML, CSS, JavaScript (Basic), RESTful APIs and Web Services

Frameworks: Hibernate ,Spring Boot, Spring MVC, Spring Security

Tools: JDBC, PostgreSQL, Servlets, JSP

Development Tools

- Version Control: Git, GitHub
- Build Tools: Maven
- IDEs: IntelliJ IDEA, Eclipse,VSCode

Testing: Manual Testing (Basic)

ACHIEVEMENTS
Battle With Code , Tech-Fest 2022: Awarded for identifying and resolving bugs in a coding competition during the Tech-Fest.

CERTIFICATION

Full-Stack Java Developer, JSpiders August 2024
